PROFESSIONAL SUMMARY

3rd-year Specific Education student, Computer Science Department (Special Needs Education) at Benha University, transitioning into Data Engineering through the AI & Data Science – Microsoft Data Engineer Program under the Digital Egypt Pioneers Initiative (DEPI). Ranked first across all tracks in the previous cohort and selected as Team Leader based on performance. Built a graduation-project platform rated “Excellent” by 15+ department heads and the President of Benha University. Developing core data engineering skills in SQL, Python, and Linux, with a working backend toolkit (Django, REST APIs, PostgreSQL/MySQL) and a fast, self-driven learning track record.

EDUCATION

Bachelor of Specific Education – Computer Science Department (Special Needs Education) 2024 – Expected 2028

Faculty of Specific Education, Benha University (3rd Year) | GPA: 3.0 / 4.0

- Graduation project built for the Faculty's Class of 2025 (4th-year capstone), rated “Excellent” by 15+ department heads and personally by the President of Benha University
- Relevant coursework: Advanced Computer Networks, Interface Programming & Software Design, Computer Maintenance & Hardware Diagnostics, Digital Montage & 3D Graphics, Educational System Design
- Balances full academic workload with active leadership roles in external technical programs (DEPI, GDG Benha)

DATA ENGINEERING LEARNING PATH

AI & Data Science – Microsoft Data Engineer Program (DEPI)

In Progress – Exp. Jan 2027

- Selected as Team Leader for the program cohort based on performance, after ranking first across all tracks in the previous season
- Studying SQL and Python (including advanced modules) with hands-on exposure to Linux (Ubuntu)
- Learning path: SQL → Python → Data Analytics → Data Engineering → Cloud → Data & AI Systems
- Core topics covered: Data Pipelines, Data Warehouses, Data Lakes, Batch & Real-Time Processing, Dashboards, Machine Learning Data Workflows

LEADERSHIP & COMMUNITY INVOLVEMENT

- Team Leader – AI & Data Science / DEPI Program: tracks team member progress, monitors task execution, evaluates contributions, and reports to program management
- HR Team Member (Non-Technical Track) – Google Developer Group (GDG) Benha, Faculty of Computers & Information
- Attended Google DevFest twice (2024 & 2025)

TECHNICAL SKILLS

- **Programming & Databases:** Python, SQL, PostgreSQL, MySQL
- **Backend & Frameworks:** Django, RESTful APIs, MVC/MVT architecture, React (frontend integration)
- **Data Engineering Fundamentals:** Data pipelines, ETL concepts, Pandas, data cleaning, exploratory data analysis
- **Tools & Platforms:** Git, GitHub, Linux (Ubuntu), PowerShell, CMD
- **Networking & Hardware:** Computer networking fundamentals; CPU/GPU/RAM/SSD/HDD diagnostics; Windows troubleshooting (SFC, CHKDSK, Disk Management)
- **AI Tools:** Practical use of AI tools for development and workflow automation – e.g., automated a full project workflow via PowerShell scripting
- **Languages:** Arabic (Native), English (B2 – Upper Intermediate)
- **Soft Skills:** Team leadership, time management, presentation & communication, problem-solving, fast self-learning, works well under pressure

CERTIFICATIONS

- Back-End Development Certificate – Google Developer Groups (GDG), Benha National University (Jul 2026)
- React Development Certificate – IEEE, Helwan University
- Human Resources Certificate – Google

PROJECTS

[Graduation Project — Faculty of Specific Education, Class of 2025](#)

- Enterprise digital portal unifying academic criteria, department resources, and student administrative guides; rated “Excellent” by 15+ department heads and the President of Benha University.

GPU Dataset Analysis — Data Engineering Project (In Progress, Exp. Jan 2027)

- End-to-end data pipeline analyzing real-world GPU hardware specifications with Python and Pandas: data cleaning, exploratory analysis, groupby aggregations, and manufacturer/foundry/memory-bandwidth comparisons.

Nway — Academic AI Assistant

- AI-driven conversational assistant grounded in faculty regulations and student guidelines, using prompt engineering and knowledge-base retrieval to automate common academic inquiries.

PowerShell System Automation Engine

- Modular CLI automation scripts (PowerShell) for environment setup, process diagnostics, and automated system maintenance routines.
