

AHMED BADAWY

Data Engineer | SQL, Python & ETL Data Pipelines

Cairo, Egypt | +20 101 134 9165 | ahmedbadawix77x@gmail.com

[GitHub](#) | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Data Engineering-focused Computer Science (Special Needs Education) student at Benha University, training in the AI & Data Science – Microsoft Data Engineer Program under the Digital Egypt Pioneers Initiative (DEPI). Ranked first across all tracks in the previous cohort and selected as Team Leader based on performance. Hands-on with SQL, Python, Pandas, and Linux to build data pipelines covering cleaning, transformation, and exploratory analysis, with working knowledge of relational databases (PostgreSQL, MySQL) and Django/REST APIs for data-driven applications. Fast, self-driven learner aiming to build reliable ETL pipelines and data platforms.

TECHNICAL SKILLS

- **Programming & Databases:** Python, SQL, PostgreSQL, MySQL
- **Data Engineering:** Data pipelines, ETL concepts, Pandas, data cleaning & transformation, exploratory data analysis (EDA), data warehouse & data lake concepts, batch & real-time processing concepts
- **Tools & Platforms:** Git, GitHub, Linux (Ubuntu), PowerShell, CMD, computer networking fundamentals
- **Backend & APIs:** Django, RESTful APIs, MVC/MVT architecture
- **AI Tools:** Practical use of AI tools for development and workflow automation – e.g., automated a full project workflow via PowerShell scripting
- **Languages:** Arabic (Native), English (B2 – Upper Intermediate)
- **Soft Skills:** Team leadership, time management, presentation & communication, problem-solving, fast self-learning, works well under pressure

PROJECTS

GPU Dataset Analysis — Data Engineering Project

- Built an end-to-end data pipeline in Python and Pandas on a real-world GPU specifications dataset: data cleaning, transformation, groupby aggregations, and exploratory analysis comparing manufacturers, foundries, and memory bandwidth.

PowerShell System Automation Engine

- Modular CLI scripts (PowerShell) automating environment setup, process diagnostics, and system maintenance routines – scripting and automation skills that carry over to pipeline operations on Linux/Windows.

[Graduation Project — Faculty of Specific Education, Class of 2025](#)

- Enterprise digital portal unifying academic criteria, department resources, and student administrative guides; rated “Excellent” by 15+ department heads and the President of Benha University.

Nway — Academic AI Assistant

- AI conversational assistant built on a structured knowledge base of faculty regulations and student guidelines, using knowledge-base retrieval and prompt engineering to automate common academic inquiries.

DATA ENGINEERING TRAINING

AI & Data Science – Microsoft Data Engineer Program (DEPI)

Selected as Team Leader for the program cohort based on performance, after ranking first across all tracks in the previous season

- Studying SQL and Python (including advanced modules) with hands-on exposure to Linux (Ubuntu)
- Learning path: SQL → Python → Data Analytics → Data Engineering → Cloud → Data & AI Systems
- Core topics covered: Data Pipelines, Data Warehouses, Data Lakes, Batch & Real-Time Processing, Dashboards, Machine Learning Data Workflows

EDUCATION

Bachelor of Specific Education – Computer Science Department (Special Needs Education)

2024 – Expected 2028

Faculty of Specific Education, Benha University (3rd Year) | GPA: 3.0 / 4.0

- Graduation project built for the Faculty's Class of 2025 (4th-year capstone), rated “Excellent” by 15+ department heads and personally by the President of Benha University
- Relevant coursework: Advanced Computer Networks, Interface Programming & Software Design
- Balances full academic workload with active leadership roles in external technical programs (DEPI, GDG Benha)

LEADERSHIP & COMMUNITY INVOLVEMENT

- Team Leader – AI & Data Science / DEPI Program: tracks team member progress, monitors task execution, evaluates contributions, and reports to program management
- HR Team Member (Non-Technical Track) – Google Developer Group (GDG) Benha, Faculty of Computers & Information
- Attended Google DevFest twice (2024 & 2025)

CERTIFICATIONS

- Digital Egypt Pioneers Initiative (DEPI) – Round 5 (R5) Scholarship Certificate – AI & Data Science: Microsoft Data Engineer Track
- Team Leader Certificate – Digital Egypt Pioneers Initiative (DEPI), Round 5 (R5)
- Back-End Development Certificate – Google Developer Groups (GDG), Benha National University (Jul 2026)
- React Development Certificate – IEEE, Helwan University
- Human Resources Certificate – Google
