PROFESSIONAL SUMMARY

Computer Science student (3rd Year, Special Needs Education track) at Banha University, currently transitioning into Data Engineering through the AI & Data Science – Microsoft Data Engineer Program under the Digital Egypt Pioneers Initiative (DEPI). Ranked first across all tracks in the previous cohort and selected as Team Leader based on performance. Built a graduation-project system rated "Excellent" by 15+ department heads and the President of Banha University, while developing core data engineering skills in SQL, Python, Linux, and cloud fundamentals. A fast self-learner with hands-on leadership experience and a growing technical toolkit (Django, React, Git), known for clear communication and strong problem-solving under pressure.

EDUCATION

Bachelor of Science – Computer Science (Special Needs Education Track)

2024 – Expected 2028

Faculty of Specific Education, Banha University (3rd Year) • GPA: 3.0 / 4.0

- Graduation project built for the Faculty's Class of 2025 (4th-year capstone), rated "Excellent" by 15+ department heads and personally by the President of Banha University
- Relevant coursework: Psychology of Special Needs, Educational Psychology & Learning Theories, Advanced Computer Networks, Interface Programming, Computer Maintenance, 3D Graphics Design, Digital Editing, Professional Ethics
- Balances full academic workload with active leadership roles in external technical programs (DEPI, GDG Banha)

DATA ENGINEERING LEARNING PATH

AI & Data Science – Microsoft Data Engineer Program — Digital Egypt Pioneers Initiative (DEPI) In Progress — Exp. Jan 2027

- Selected as Team Leader for the program cohort based on performance, after ranking first across all tracks in the previous season
- Studying SQL and Python (including advanced modules) with hands-on exposure to Linux (Ubuntu)
- Learning path: SQL → Python → Data Analytics → Data Engineering → Cloud → Data & AI Systems
- Core topics covered: Data Pipelines, Data Warehouses, Data Lakes, Batch & Real-Time Processing, Dashboards, Machine Learning Data Workflows

LEADERSHIP & COMMUNITY INVOLVEMENT

- Team Leader — AI & Data Science / DEPI Program: tracks team member progress, monitors task execution, evaluates contributions, and reports to program management
- HR Team Member (Non-Technical Track) — Google Developer Group (GDG) Banha, Faculty of Computers & Information
- Attended Google DevFest twice
- Holds a Human Resources certificate from Google

TECHNICAL SKILLS

Databases & Data SQL; Python (in progress via Microsoft Data Engineer / DEPI program)	Frameworks Django (Google Back-End certificate); React (IEEE Helwan certificate)
Tools & Platforms Git, GitHub, Linux (Ubuntu), PowerShell, CMD	AI Tools Practical use of AI tools to build and troubleshoot projects — e.g., automated a full project workflow via a PowerShell script
Networking Solid fundamentals in computer networking	Hardware & Troubleshooting CPU/GPU/RAM/SSD/HDD diagnostics; Windows troubleshooting (SFC, CHKDSK, Disk Management)
Languages Arabic (Native); English (Professional, B2 — language-school foundation, ongoing professional-English training)	Soft Skills Team leadership, time management, presentation & communication, problem-solving, fast self-learning, works well under pressure

CERTIFICATIONS

- AI & Data Science – Microsoft Data Engineer Program, Digital Egypt Pioneers Initiative (in progress; expected completion January 2027)
- Back-End Development Certificate — Google (SQL, Python, Django)
- React Development Certificate — IEEE, Helwan University
- Human Resources Certificate — Google

KEY PROJECTS

Graduation Project — Faculty of Specific Education, Class of 2025

- Capstone system rated "Excellent" by 15+ department heads and the President of Banha University.

Brazely — The Essence of Syrian & Middle Eastern Fine Dining

- Restaurant website showcasing a Syrian & Middle Eastern fine-dining concept.

Basbosa El Zahabeya — Oriental Sweets Shop Website

- Website built to showcase a local oriental sweets & desserts shop.

Bonduk — Premium Graphic Designer & Branding Specialist

- Portfolio website built for a graphic designer & branding specialist.

Petals & Blooms — Exquisite Flower Gallery

- Flower shop gallery website showcasing floral arrangements and products.

GPU Dataset Analysis — Data Engineering Projects (in progress)

- GPU dataset analysis using Python and Pandas — data cleaning, exploratory analysis, statistical summaries, manufacturer/foundry comparisons, and visualizations. Expected completion: January 2027.

WHY I'M A STRONG FIT FOR DATA ENGINEERING

- Actively building foundational data engineering skills (SQL, Python, Linux, cloud) through a structured national program (DEPI), with hands-on leadership responsibility as Team Leader
- Proven fast learner — picked up Django, React, and Git, and used AI tools to build and automate a full project workflow via PowerShell scripting
- Demonstrated academic excellence and initiative — graduation project earned "Excellent" from 15+ department heads and the University President
- Selected for leadership and cross-functional roles (DEPI Team Leader, GDG Banha HR) based on performance, reflecting reliability and ownership
- Comfortable working independently, communicating with technical and non-technical stakeholders, and solving problems under pressure
